

The new education precinct building for QUT featuring skylights with reflect mirror, window and entry mullions, external rooftop fascia and feature louvre blades

Trusted advisors to building owners and managers that want to ensure their aluminium cladding is safe and compliant.

Lennox Facades specialises in recladding and installing, quality aluminium facades, that ensure your building is visually appealing and safe.

We provide a full project service, from identification and removal of non-compliant facades, through to certification of newly installed compliant aluminium cladding.

We are known for quality work and reliable service with minimal disruption.

**Benefits of engaging Lennox Facades to manage your recladding requirements:**

We'll save you time and money by avoiding costly mistakes and wasted time. We have a combined 50 years experience in the industry, we'll get on with the best recladding solution for you and leave you to get on with your job.

Gain peace of mind knowing your building is compliant and insurable, tenants and insurers will expect this assurance.

You'll protect your investment and attract more quality tenants, by recladding with a safe and visually appealing aluminium facade.
